▸ This corrects the article "Validation of the Phoenix Criteria for Sepsis and Septic Shock in a Pediatric Intensive Care Unit" in volume 40, number 10, e106.

To the Editor:

The authors regret that there were errors in Fig. 1. The underlying data, statistical analyses, and study results remain correct, and this correction does not affect the interpretation or conclusions of the study. To ensure accuracy and consistency with the manuscript text, we request replacement of the originally published figure with the corrected version.

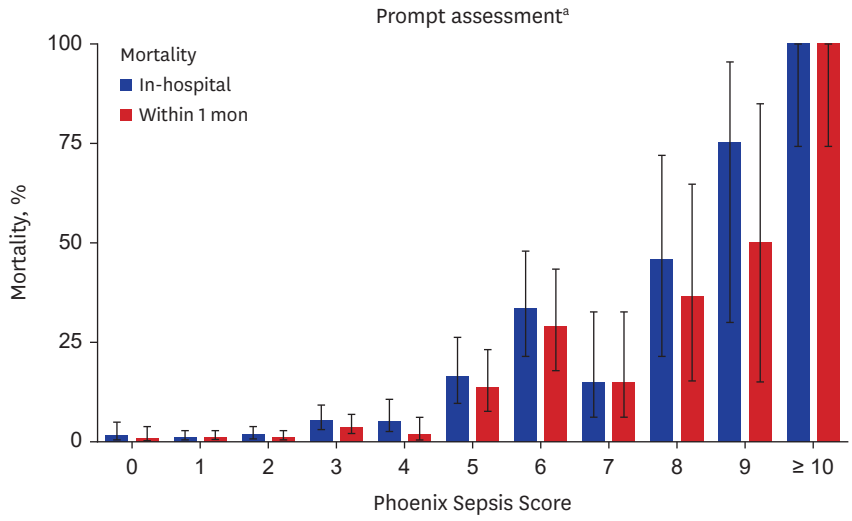
Content of correction:

Original Fig. 1: The published figure displays numerical values derived from an earlier internal working table generated during the preliminary stages of analysis. These values do not correspond to the final analysis dataset and therefore do not match the mortality rates and sepsis percentages reported in the manuscript text. This incorrect figure was inadvertently included during the revision process and remained in the final published version.



No. of events											
Admissions	81	173	211	123	82	30	31	13	6	4	5
In-hospital mortality	0	1	9	7	12	11	6	6	5	3	5

Corrected Fig. 1: The figure has been replaced with the correct version generated directly from the finalized analysis dataset. All numerical values, labels, and annotations in the corrected figure are fully consistent with the manuscript text, statistical analyses, and reported results. No other components of the manuscript have been modified.
